Subject: microsoft settlements

I feel the Dept. Of Justice has sold out the American public in its case against Microsoft. I feel that Microsoft is the "Mafia" of the internet. I have the feeling that political contributions and lobbying have negated the rightful lawsuits pending by Attorney Generals of the injured states that have instituted the lawsuits. i feel the individual users of the internet plus the providers or the software and hardware will have been done great harm by the ineffective action by the Dept. Of Justice.
